

product feature inventory

Every capability built into the Bhojpatra platform — the customer site, the vendor console, the partner console and the admin panel — itemised and counted.

441

individually testable features across sixteen areas of the product, verified against the codebase.

about this document

This is a complete inventory of what the Bhojpatra platform does today. Each entry is one *atomic feature* — a single capability a person can use, a rule the system applies, or something it does automatically. A whole screen is not one feature; the things you can do on it are.

By that measure the platform holds **441 features**. They are grouped into sixteen areas and numbered continuously from 1 to 441, so any single capability can be referred to by its number.

How the list was built. Every feature below was read out of the working codebase rather than from a specification — 60 pages, 117 interface endpoints, 187 interface components and 22 database tables. Nothing planned or partly built is included.

A**global shell & platform ux**

Chrome, navigation and app-level behaviour present on every screen.

25
FEATURES

- 1 Header logo returns to home
- 2 Header city picker — broadcasts the change app-wide
- 3 Language toggle, English ⇌ हिंदी
- 4 Account menu panel (signed-in / signed-out states)
- 5 Partner menu panel for partner-role accounts
- 6 Mobile tab bar — four destinations plus account, active state, safe-area inset
- 7 Floating chat — knowledge-base question & answer
- 8 Floating chat — shortcut question chips
- 9 Floating chat — “Request a callback” captured as a lead
- 10 Floating chat — draggable on mobile, lifts clear of sticky docks
- 11 Sticky booking bar (site-wide call-to-action dock)
- 12 Compare tray dock
- 13 Footer — quick links, legal links, contact information
- 14 Brand ribbon
- 15 WhatsApp share button with preset message
- 16 Scroll-to-top control
- 17 Scroll watermark
- 18 Site loader / route transition
- 19 Reveal-on-scroll animation, respecting reduced-motion preference
- 20 Toast notification system
- 21 Pull-to-refresh on mobile
- 22 Install-app prompt (PWA)
- 23 Service worker with offline shell, network-first navigation
- 24 Web app manifest — installable on a phone home screen
- 25 404 page plus global and per-route error boundaries

B**homepage funnel**

The conversion path from landing to a started booking.

18
FEATURES

- 26 Hero — location auto-detected and pre-filled
- 27 Hero — occasion dropdown with “Other” free-text
- 28 Hero — date picker enforcing the minimum lead time
- 29 Hero — “Book” carries occasion, date and city forward
- 30 Hero — “Find caterers” carries the same parameters
- 31 Hero — background image changes with occasion and city
- 32 Hero — trust badges and animated statistic counters
- 33 Promotional banner
- 34 Choose Occasion rail — marquee cards into the booking wizard
- 35 Top Categories rail, with Baina Box injected
- 36 Top Categories — price display toggled by admin configuration
- 37 Packages section — Silver / Gold / Platinum, “Popular” highlighted
- 38 Packages — “Book [tier]” deep-links into the wizard
- 39 Baina Boxes brand carousel and call-to-action
- 40 Gallery — two independent marquee rows
- 41 Testimonials — live customer reviews merged with curated ones
- 42 Promotional lead capture (email or phone)
- 43 Campaign popup — once per visitor, click-through, dismissible

C

vendor catalog

Discovery and filtering across the caterer marketplace.

20
FEATURES

- 44 Free-text search
- 45 City filter
- 46 State filter
- 47 Category lens — Full Catering, Single Stall, Live Stall, Baina Box, Essential Service
- 48 Lens-aware filter neutralisation — hidden filters stop applying
- 49 Live result counts on each lens chip
- 50 Cuisine multi-select
- 51 Diet filter — a “Veg & Non-Veg” vendor satisfies both
- 52 Marketplace tier filter
- 53 Price-band filter
- 54 Meal-time filter
- 55 Time-slot filter
- 56 Sort by relevance
- 57 Sort by rating
- 58 Sort by price, low to high
- 59 Sort by price, high to low
- 60 Filter sheet with an active-filter count badge
- 61 Every filter can be pre-set from a URL, for deep links and campaigns
- 62 Vendor card — image, name, city, cuisines, price per plate, rating
- 63 Compare checkbox on each card, up to eight

D

compare

Side-by-side evaluation before committing.

6
FEATURES

- 64 Compare tray showing the selected vendors as chips
- 65 Remove one, or clear the whole tray
- 66 Comparison enabled at two vendors, capped at eight
- 67 Side-by-side table — price, cuisines, diet, tier, rating
- 68 Sortable comparison columns
- 69 Book or remove any vendor from within the table

E

vendor detail & profile

The brand page a customer decides from.

15
FEATURES

- 70 App bar with vendor name, location and back navigation
- 71 WhatsApp share of the vendor
- 72 Gallery image carousel
- 73 Summary card — verified badge, rating, price range, cuisines
- 74 Menu grouped by course
- 75 Dish row — photo, bilingual name, veg / non-veg mark, price
- 76 Per-band menu views (Silver / Gold / Platinum)
- 77 Full-menu page
- 78 Live counters and services listing
- 79 Essential Service offering display
- 80 Rating summary from the review aggregate
- 81 Review list — name, stars, date, comment, photos
- 82 “Verified booking” and “You” tags on reviews
- 83 Write-a-review panel, unlocked only by a completed booking
- 84 Sticky “Book This Caterer” bar, with the vendor pre-selected

F

baina box

The gift-box and mithai hamper line.

5
FEATURES

- 85 Baina Box marketplace overview
- 86 Per-brand detail page
- 87 Box size selection — ½ kg, 1 kg and up to four custom sizes
- 88 Quantity selection and order panel
- 89 Fixed-price and per-unit price display

G

venues

Venue discovery, quoting and availability.

15
FEATURES

- 90 Explorer — city filter
- 91 Explorer — search
- 92 Explorer — venue type filter
- 93 Explorer — capacity filter
- 94 Explorer — rating filter
- 95 Explorer — sort
- 96 Venue card and detail page — gallery, capacity, amenities, price, rating
- 97 Owner-set pricing per space, with unit counts
- 98 Per-space unit selection at booking time
- 99 Multi-space quote calculation
- 100 Venue-specific GST and ten per cent advance
- 101 Availability calendar — already-booked dates blocked
- 102 WhatsApp enquiry against a venue
- 103 Add to booking — the venue fee folds into the feast order
- 104 Venue reviews panel

H

collections & content pages

Browse-by-theme entry points and the editorial pages.

11
FEATURES

- 105 Categories explorer
- 106 Occasions explorer
- 107 Service Packages page
- 108 Package comparison switcher
- 109 Internal tier-deck prototype page (hidden from search)
- 110 About page, editor-driven
- 111 Contact page with enquiry form
- 112 Terms page, editor-driven
- 113 Refund policy page, editor-driven
- 114 Careers page, editor-driven
- 115 QA route index (hidden from search)

I

booking wizard — six steps

The core revenue path: package, menu, counters, event, service, payment.

33
FEATURES

- 116 Step 1 — package selection across three tiers
- 117 Step 1 — “Popular” tier highlighted
- 118 Step 1 — custom-package enquiry over WhatsApp
- 119 Step 2 — per-course menu tabs
- 120 Step 2 — a vendor chosen per course
- 121 Step 2 — dish multi-select against the course quota, or skip
- 122 Dish eligibility per band — what each tier is served
- 123 Per-band, per-course rate per plate
- 124 Step 3 — live counters, include or skip
- 125 Step 3 — vendor roster per counter, with change-vendor
- 126 Step 3 — counter price shown as a range across eligible vendors
- 127 Step 4 — occasion, with “Other”

- 128 Step 4 — date gated by the greater of package and occasion lead time
- 129 Step 4 — city, with “Other”
- 130 Step 4 — guest count from 50 to 50,000, repricing live
- 131 Step 4 — attach a venue and its fee
- 132 Step 4 — meal time
- 133 Step 4 — time slot
- 134 Step 4 — food preference
- 135 Step 4 — add-on search across English, Hindi and keyword aliases
- 136 Step 4 — add-on category filter
- 137 Step 5 — service package: Single Stall, Live Counter, Hi-Tea, VIP
- 138 Step 6 — full order summary
- 139 Step 6 — coupon application
- 140 Step 6 — each automatic discount shown as its own line
- 141 Step 6 — referral code captured from the link
- 142 Step 6 — checkout contact panel, pre-filled from the account and editable
- 143 Step 6 — payment method choice
- 144 Step 6 — instalment (EMI) plan selection
- 145 Step 6 — sign-in required before confirming
- 146 Confirm — order created, confirmation email sent, success state shown
- 147 Draft auto-saves and restores on reload
- 148 Wizard chrome — progress stepper, editable event brief, scroll reset per step

J single stall wizard — three steps

The short, brand-first path for a one-stall booking.

8 FEATURES

- 149 Brand-first entry — the stall is chosen before the wizard opens
- 150 Step 1 — stall menu, a fixed set menu by default or free choice
- 151 Step 2 — extras and counters
- 152 Step 3 — review and pay
- 153 Per-step validation gating the Continue action
- 154 Draft persistence and restore
- 155 Event brief bar kept in step with the header location
- 156 Shared wizard chrome reused from the six-step flow

K my bookings & customer dashboard

Post-purchase self-service.

18 FEATURES

- 157 Bookings list, newest first
- 158 Status filter tabs — All, Confirmed, Pending, Completed, Cancelled
- 159 Status badges
- 160 Payment status display
- 161 Booking detail — menu, add-ons, service, venue, vendor contacts
- 162 Pay advance, moving an order from Pending to Confirmed
- 163 Pay balance, settling the outstanding amount in one go
- 164 Instalment schedule display with due dates
- 165 Cancel a booking
- 166 Request a refund
- 167 “Get Help” raises a support ticket, auto-triaged
- 168 Per-vendor review — stars and comment
- 169 Review photo upload, up to four
- 170 Edit your own review inline
- 171 Download the invoice as a PDF
- 172 Download a plain receipt as a PDF
- 173 Invoice preview and shareable link
- 174 Unified dashboard across every account a person holds

L

authentication & account

Identity, access and personal settings.

15
FEATURES

- 175 Sign up as a customer
- 176 Sign up as a vendor, with GST required
- 177 Sign up as a partner, by partner type
- 178 Log in, redirected to the right dashboard for the role
- 179 Forgot password — never reveals whether an email exists
- 180 Reset password — token and email validated, with expiry
- 181 Change password — current verified, new must differ, confirmation matched
- 182 Log out
- 183 Signed session cookie with a session endpoint
- 184 Edit profile display name; email is read-only
- 185 “Accounts you hold” role badges
- 186 Language preference
- 187 Email notification preferences
- 188 Add a partner role — mints a referral code and a dashboard tab
- 189 Route guards on everything that requires a session

M

vendor console

Supply-side onboarding, then the menu and pricing tools.

30
FEATURES

- 190 Registration 1 — business name, owner, contact, city and state
- 191 Registration 1 — cuisines, from presets or custom
- 192 Registration 1 — optional Google rating and review count
- 193 Registration 2 — four KYC uploads with drag-drop and progress
- 194 Registration 2 — GST 15-digit and FSSAI 14-digit validation
- 195 Registration 3 — catering category selection
- 196 Registration 3 — menu packages: name, rate per plate, dishes
- 197 Registration 3 — minimum and maximum guests, events per day
- 198 Registration 3 — Baina Boxes, up to twelve, with sizes and photo
- 199 Registration 3 — Essential Service: per-guest rate and inclusions
- 200 Registration 4 — service cities, with custom entries
- 201 Registration 4 — live counters offered, with custom entries
- 202 Registration 4 — gallery photos, up to eight
- 203 Registration 5 — review, submit, and a permanent vendor ID issued
- 204 Application lifecycle — Pending, then Verified or Rejected
- 205 Dashboard header — business name, verification badge, assigned tier
- 206 Publish status band — Live, Not published, Pending review, Hidden
- 207 Business basics and cover photo editor
- 208 Gallery add and delete, up to eight
- 209 Catering category toggles
- 210 Menu section per course — enable, disable, and per-plate uplift

- 212 Per-band configuration — dish eligibility, course rate, dish quota
- 213 Separate Live Stall menu section
- 214 Baina Box menu editor, up to twelve
- 215 Essential Service editor
- 216 Live counters and services — toggle and override the platform price
- 217 Menu type — a fixed set menu, or let the customer choose
- 218 Save validation; an approved menu returns to review when edited
- 219 Pre-fill from the registration application, and prune orphan dish photos

N

partner console

Planners, individual referrers and venue owners.

20
FEATURES

- 220 Landing — four partner-type cards into signup
- 221 Landing — statistics band
- 222 Landing — benefits and payout preview
- 223 Landing — how it works, and partner testimonials
- 224 Landing — frequently asked questions
- 225 Landing — enquiry form, with a WhatsApp follow-up link
- 226 Dashboard header — name and role badge
- 227 Verification badge; the gate is three completed bookings
- 228 Role switcher — planner, individual and venue on one account
- 229 Add another role
- 230 Overview — payout card: total, active, due, due date
- 231 Overview — key figures: referrals, confirmed, referred value
- 232 Overview — recent referrals
- 233 Referral code with copy
- 234 Share & Earn — full referral link with copy
- 235 Share & Earn — estimated reward calculation
- 236 Settle-payout request over WhatsApp, for verified partners
- 237 My Referrals — full table with statuses and total referred value
- 238 My Venue — listing form, published after admin approval
- 239 My Venue — photo upload and per-space pricing with units

O

admin panel

Twenty-one operational modules — the back office that runs the marketplace.

110
FEATURES

LOGIN 2

- 240 Admin login with email and password
- 241 Redirect if already authenticated, with session persistence

DASHBOARD 11

- 242 Headline figure — total bookings
- 243 Headline figure — pending approvals
- 244 Headline figure — advance collected
- 245 Period picker
- 246 Month-on-month trend
- 247 Recent bookings table
- 248 Pending approvals panel
- 249 Analytics — revenue trend
- 250 Analytics — bookings trend
- 251 Analytics — top cities
- 252 Analytics — top vendors

BOOKINGS 9

- 253 Statistic cards
- 254 Search
- 255 Status filter
- 256 City filter
- 257 Pagination
- 258 Detail view
- 259 Status transitions
- 260 Payment progress
- 261 Referral attribution shown on the order

CUSTOMERS 7

- 262 List with statistic cards
- 263 Search
- 264 Status and city filters
- 265 Customer detail

266 Booking history per customer

267 Internal note

268 Bookings sub-tab

VENDORS 7

269 Vendor list

270 Search

271 Tier filter

272 Status filter

273 City filter

274 Vendor detail — Overview, KYC, Menu and Bookings tabs

275 Push to, or remove from, the Top 5 (capped at five, oldest drops)

VENDOR APPROVALS 7

276 Approvals queue

277 Review — Overview tab

278 Review — Documents tab

279 Tier override at the point of approval

280 Approve — vendor verified and documents marked verified

281 Reject

282 Re-login handling on an expired admin session

VENUES & VENUE APPROVALS 5

283 Venue catalog

284 Quick publish / hide

285 Venue approvals queue

286 Venue approval review

287 Publishing gated on verification

MENU MODERATION 4

288 Pending vendor-menu queue

289 Menu review

290 Approve — the menu goes live everywhere

291 Hide a menu

SERVICE PACKAGES 5

292 Service package editor

293 Bilingual name and subtitle

294 Includes, excludes and best-for lists

295 Price range

296 Per-plate or open-top pricing mode

COUPONS 3

297 Create, edit and delete coupons — code, label, percentage, cap, eligibility, dates, status

298 Search

299 Status filter

CAMPAIGNS 2

300 Create, edit and delete campaigns — name, link, status

301 Desktop and mobile artwork upload with preview

PAYMENTS 4

302 Transaction list

303 Search

304 Status and method filters

305 Payment detail

SETTLEMENTS 3

306 Payouts derived per vendor per event month

307 Mark settled, with a who-and-when audit trail

308 CSV export

REFUNDS 3

309 Lifecycle — Requested, Approved, then Processed or Declined

310 Refund detail

311 Instant updates that roll back if the server rejects them

REPORTS 4

312 Monthly report

313 Vendor performance report

314 Cities report

315 CSV export

LEAD GENERATION 4

316 Leads listed by source — promotion, booking intent, home form, callback

317 Search

318 CSV export

319 Update or delete a lead

SUPPORT TICKETS 3

320 Ticket list

321 Status transitions — Open, In Progress, Resolved

322 Search with status and priority filters

ENQUIRIES 4

323 Contact enquiry list

324 Search

325 Enquiry detail

326 CSV export

REFERRALS 4

327 Rates card — customer and referrer percentage per partner type

328 Referrer leaderboard

329 Referrer detail

330 Handling for codes that belong to no registered partner

CONTENT CONTROL 7

331 Home page content

332 Site pages

333 Contact information

334 Banners

335 Testimonials

336 Frequently asked questions

337 Reset any section to its default

SETTINGS 5

338 Change the admin password

339 Occasions — bilingual name and lead days

340 Locations — bilingual name

341 Payments — UPI address, merchant name and limit

342 Payments — static QR upload

REVIEW MODERATION 2

343 Review list

344 Hide or unhide a review

ADMIN SHELL 5

345 Sidebar navigation across all twenty-one modules

346 Top bar with breadcrumbs derived from the route

347 Global admin search

348 Session guard on every admin route

349 Seed and live data merged, de-duplicated, with instant updates that roll back on failure

PAYMENTS, UPI & INSTALMENTS 13

- 350 Pay by UPI address
- 351 Pay by scanning a QR code
- 352 Bhojpatra Connects — collect later
- 353 UPI deep link built to spec
- 354 UPI address format validation
- 355 Admin override of the merchant UPI address
- 356 QR generated from the UPI address
- 357 Admin-uploaded static QR, with type and size limits
- 358 Manual transaction reference capture, validated and normalised
- 359 Payment status lifecycle — advance received, settled, refunded, pending
- 360 Payment amount can never exceed the booking total
- 361 Ten per cent advance
- 362 Instalments — one, three or six, unlocked at three months' lead, with dated schedule

INVOICES & RECEIPTS 7

- 363 Branded tax invoice PDF — masthead, itemised lines, bill-to, watermark
- 364 GST at eighteen per cent on the taxable base
- 365 Amount paid read live from the order, never a stale snapshot
- 366 "Paid in full" seal once the balance reaches zero
- 367 Per-plate figure derived from total and guest count
- 368 Shareable invoice link that works offline
- 369 Plain-text receipt PDF

COUPONS & AUTOMATIC DISCOUNTS 7

- 370 Coupon lookup and validity — case-insensitive, active, in date, occasion-eligible
- 371 Coupon discount as a percentage of the pre-tax bill, capped
- 372 Volume discount across three guest bands
- 373 Early-bird discount across two lead-time bands
- 374 Occasion discount
- 375 Discounts stack, with a floor that keeps the taxable base at or above zero
- 376 Zero-value discount lines hidden

REFERRALS 6

- 377 Referral code format
- 378 Self-referral blocked at account level
- 379 Self-referral blocked by phone match
- 380 Customer discount as a percentage of the pre-tax bill
- 381 Referrer reward on confirmed value, net of refunds
- 382 Admin-set rates per partner type, capped, settled manually

REVIEWS & RATINGS 8

- 383 One review per vendor per booking, updated in place
- 384 One to five stars
- 385 Comment up to 600 characters
- 386 Up to four photos, privately stored and served
- 387 Published immediately on submission
- 388 Admin hide and unhide
- 389 Vendor rating as the average of published reviews
- 390 Rating mirrored onto the booking, with a summary endpoint

REFUNDS & SETTLEMENTS 6

- 391 Refund request raised from support, capped at what was paid
- 392 Lifecycle — Requested, Approved, then Processed or Declined

- 393 Refund method inherited from the original payment
- 394 Settlement equals collected less processed refunds, per vendor per event month

- 395 Only online-paid completed bookings settle
- 396 Mark settled snapshots the payout with an audit trail

LEADS, ENQUIRIES, SUPPORT, CAMPAIGNS & EMAIL 14

- 397 Lead capture — promotional form
- 398 Lead capture — booking intent
- 399 Lead capture — home page form
- 400 Lead capture — callback request
- 401 Contact enquiries persisted
- 402 Support ticket creation
- 403 Support auto-triage — priority derived from category

- 404 Campaign — newest active campaign selected
- 405 Campaign — frequency capped per visitor
- 406 Booking confirmation email to the customer
- 407 Admin alert — new order and payment
- 408 Admin alert — lead, callback, enquiry, support ticket
- 409 Admin alert — vendor application, partner signup, venue listing
- 410 Password reset email, with per-event alert toggles

LOCALISATION 5

- 411 Every string available in English and Hindi
- 412 Preference resolved from account, then cookie, then default
- 413 Preference persists across reloads and tabs

- 414 Bilingual taxonomy — occasions, locations, service packages, discount reasons
- 415 Brand display face used for Hindi and display headings

GEOGRAPHY & LOCATION 8

- 416 City hint from the visitor's network
- 417 Browser location request
- 418 Reverse geocoding, with an optional secondary provider
- 419 City normalisation and alias matching

- 420 A manual choice is never silently overwritten
- 421 Twenty-four hour freshness window
- 422 A location change re-syncs every component on the page
- 423 Free-text "Other" city fallback

TAXONOMY & CONTENT CONFIGURATION 6

- 424 Admin-managed occasions with their own lead days
- 425 Admin-managed locations
- 426 Admin-managed service packages

- 427 Top 5 vendor pinning
- 428 Home page content management, reconciled against defaults
- 429 Site page content management

MEDIA & STORAGE 6

- 430 Vendor photos — upload, private serve, delete
- 431 Venue photos — upload and private serve
- 432 Review photos — upload and private serve

- 433 KYC documents — type and size limits, privately served
- 434 Campaign artwork storage
- 435 Payment QR storage

SECURITY & PLATFORM 6

- 436 Signed session cookie
- 437 Password hashing and verification
- 438 Admin session handling

- 439 Role guard on every protected route
- 440 Reset tokens hashed, with expiry
- 441 Administrator account seeded if missing
